

## Sustainable production cycle / Really sustainable production cycle

**SALT**  
**COLORS** used for the conservation of raw hides. It is then inserted

te and  
  
d reused  
on of  
f tanning

**HAIR RECOVERY**  
The polluting load of this processing is reduced by about 30%.  
The recovered hair is destined for other processes.

**LEATHER POWDER**  
That results from our organic production, is used to enrich organic fertilizers.

**LEATHER SCRAPS**  
Transformed into regenerated leather for footwear and leather goods components.

Le immagini di questo catalogo possono differire dalla resa su pelle. The colours of the images of this catalogue may differ from the way they appear on the leather.
